Cloudy	Cloudy	Cloudy	Light rain	Heavy Rain	Heavy Rain
Precipitation probability					
20%	10%	10%	60%	80%	90%

Forecast for Monday 16 Nov 2020

Weather: A cloudy start to the morning with a few scattered showers, but cloud breaking and lifting with sunny spells developing through the morning. Cloud increases from the west through the afternoon with outbreaks of rain developing, perhaps wintry for a time on the highest summits, the rain becoming, especially across western and southern fells, more persistent and heavy at times in the evening.

Chance of cloud free mountain/hill tops above 800m: Little chance at dawn with periods or persistent cloud around 600m and patches below but becoming around 75% through the morning with cloud becoming more occasional above 750m. Chances in the west fall close to zero again through the afternoon, and more generally through the evening, with cloud becoming periods above 600m with patches below.

Visibility: Good, becoming very good for a time through the morning, but just a few kilometres in heavier rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts around 65mph over higher ridges and summits.

Forecast for Tuesday 17 Nov 2020

Weather: Occasionally heavy rain clearing around or soon after midnight but it remains mostly cloud through Tuesday with further rain at times, especially across southern and western fells.

Maximum wind: Southwesterly 35-45mph, with gusts around 70mph over ridges and summits.

Chance of cloud free mountain/hill tops above 800m: Little chance through much of the day with periods or persistent cloud above 600m, and nearer 300m at times over southern and western fells, especially later in the day.

Visibility: Good falling to several kilometres in rain.

Temperature: **Valleys:** Around plus 10 Celsius at dawn rising to plus 13 Celsius by day.
At 800m: Around plus 7 Celsius
Freezing level: Above summits
